IMMIGRATION IN EUSKADI

Elías González Gurrutxaga
In Euskadi the number of immigrations increases from 2200 to 25560 approximately in the last twelve years.
100 YEARS AGO

The situation of the immigration in Euskadi in the 20th century changes dramatically because 100 years ago the people from there and from all Spain in general, emigrated to other countries in Europe and America because the situation here was really bad. For example: in USA there are about 55000 people with basque origin.
BUT THE SITUATION CHANGED

But now is Euskadi the place which receives enough immigrants from the rest of Spain and from other countries like Romania and South America because, beside Catalunya and Madrid, is the richest community of Spain.
My opinion

I think Euskadi is one of the richest communities in Spain because from the end of the Civil War (1936-1939) and despite of the terrorism, it became a very important industrial focus.
